Model Components Breakdown

Model 1: Grey Prediction (Baseline Trend)
- Historical
- GM(1,1) Prediction

Employment (万人)
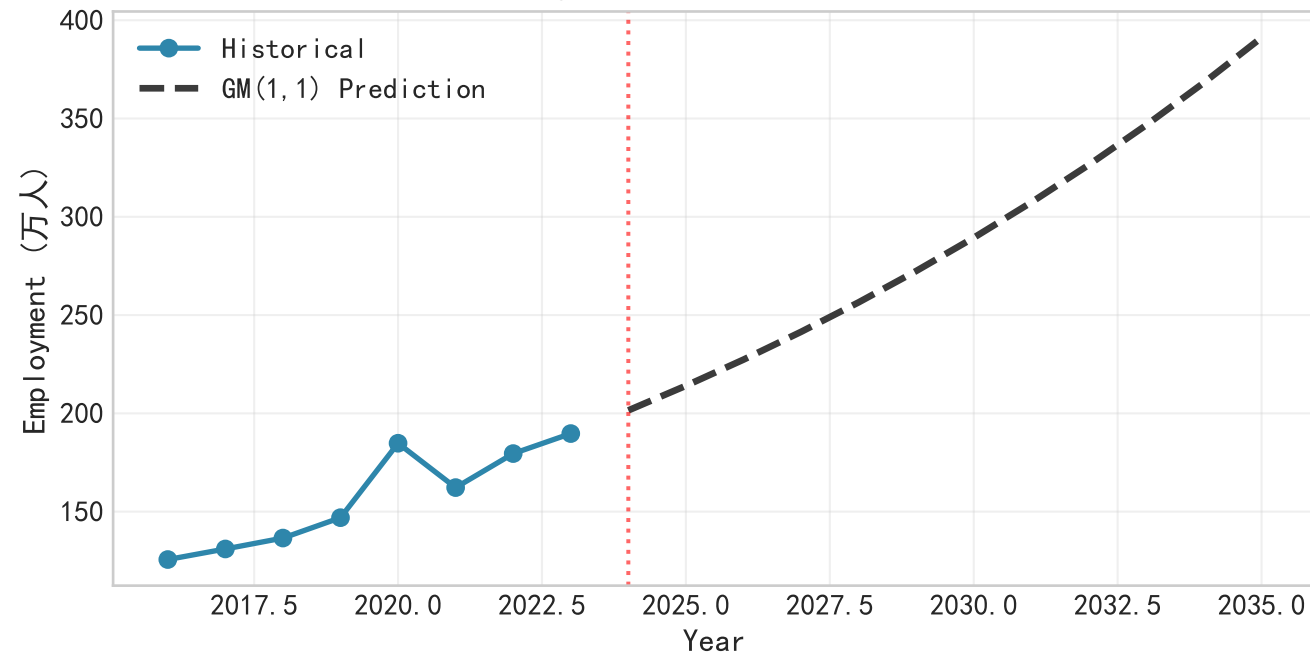

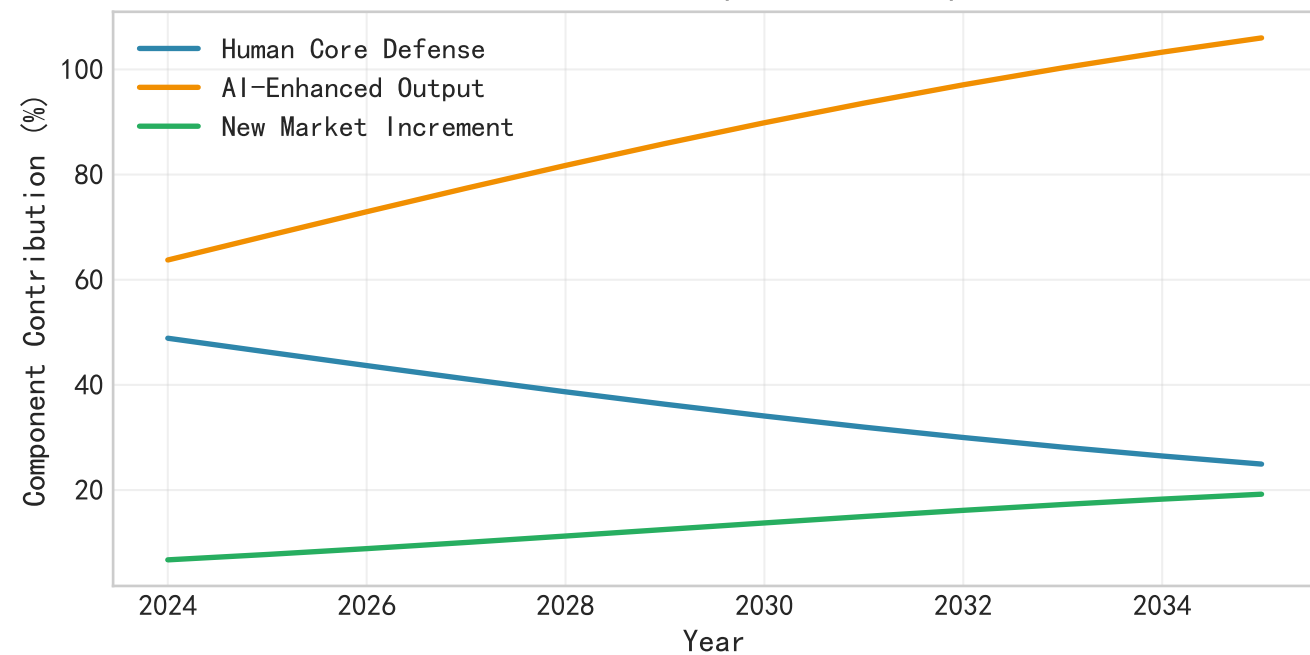

Model 2: Technology Penetration (Logistic S-Curve)

D1 (Automation Potential) = 0.85
D2 (Skill Evolution) = 0.15

Penetration Rate (%)
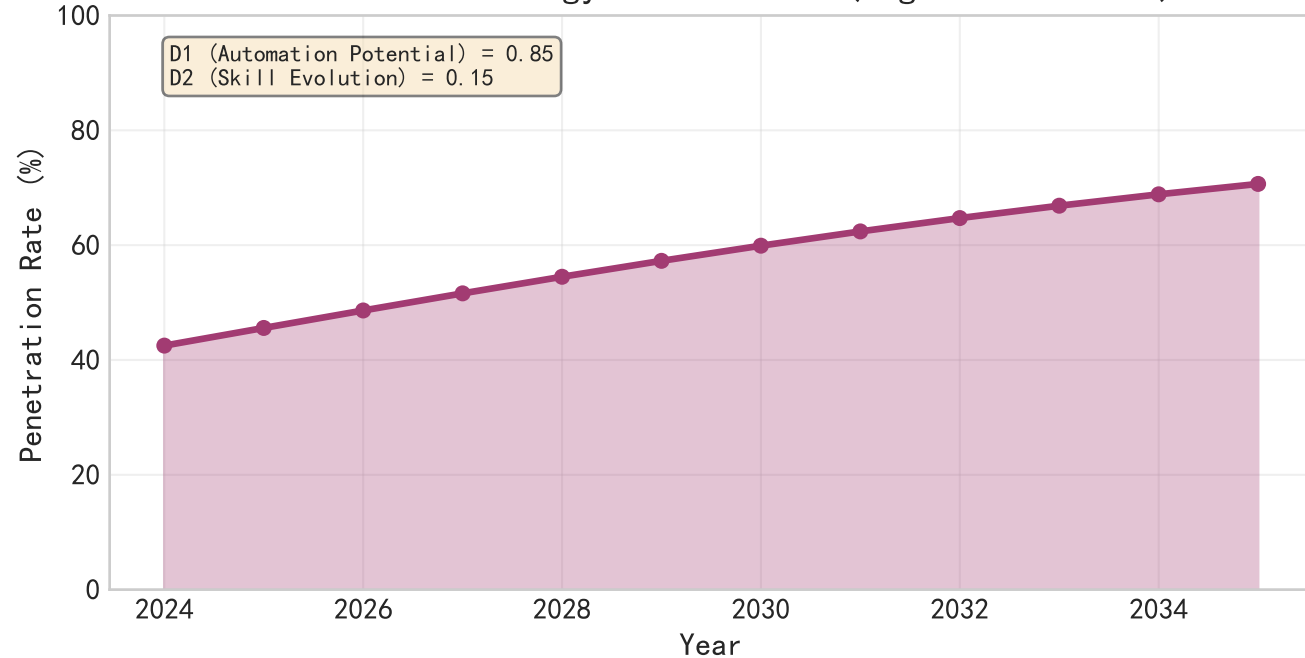

Model 3: Value Recomposition Components
- Human Core Defense
- AI-Enhanced Output
- New Market Increment

Component Contribution (%)

Final Comparison: Baseline vs AI-Adjusted
- Historical
- Baseline (No AI)
- Final (AI-Adjusted)

Employment (万人)

Year
